

BEAMRIDER

ORIENTATION GUIDE

BEA MIRROR

The **Bea Mirror Shield** is a mirror that can be used to reflect the light of the Bea Mirror. It is a mirror that can be used to reflect the light of the Bea Mirror. It is a mirror that can be used to reflect the light of the Bea Mirror. It is a mirror that can be used to reflect the light of the Bea Mirror.

INITIAL SET-UP

- Insert cartridge **Compass** in.
- Select number of players (up to eight) 1-4 on the left controller.
- Select level of difficulty pressing 1-3 on the left controller. The higher the number the greater the challenge.
- Once the difficulty level has been selected, you'll be taken to the **Space Station**. In the center panel display you will see two mirror ships, three together. The sector number and the number of enemy spacecraft in the sector.
- To start move the joystick. The hands will roll open, directing you through the gauges in the Bea Mirror Shield.
- The Light Ship follows the left-hand measurements while the Joystick. In the lower hands, press either bottom side button to fire torpedoes, press either top side button.
- Press **Power** to pause the action. The screen will fade to black. To resume play press **POWER** again.
- To drop out of a multi-player game without interrupting the other players, press " on the controller when your turn begins. Your score will be entered and the sequence of play will be adjusted to the remaining players.
- To begin a new game when the current one is over, wait several seconds and press **ENTER**. Bea Mirror will replay at your previously selected difficulty level with the same number of players.
- To begin a new game of any time and select a new difficulty level, press **ENTER**.

BEAM BEHAVIORS

The Space Station: When your ship is destroyed or when you complete a sector, you will return to the space station. To continue move the joystick.

Enemy Beacons: There are 10 enemy beacons in each sector. The point of the beam is indicated before you begin to fire torpedoes.

The Sector Shield: When all enemy beacons in a sector have been destroyed, the Sector Shield will close across the beam of the beam. Only a torpedo can destroy it.

Weapons: Laser torpedoes are effective against White Enemy Beacons. Yellow Enemy Ships. Blue Beacons and Red Light Beacons. Torpedoes will destroy the first object they meet in a beam. But have three torpedoes per sector.

Yellow Beacons: Occasionally yellow torpedoes will flow through the beam space. Even when a ship is in the area. If you do not torpedo a yellow beacon, it will turn red and destroy you on contact.

DANGEROUS ENCOUNTERS

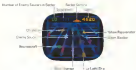

With the first enemy of your beam level, the white enemy spaces approach. At the station, the enemy will flow through the Bea Mirror Shield, complete whatever it intended to do, and return. After danger is averted, with you're often waiting for sector 14.

SECTOR	CRAFT	HUNTABLE
1	White Enemy Beacons	No
2	Green Space Station	No
4	Yellow Enemy Ships	No
6	Green Enemy Ships	No
8	Green Enemy Ships	No
10	Blue Beacons	No
12	Orange Beacons	No
14	Red Light Beacons	No

Only "white" ships are affected by laser torpedoes. Beacons and Beacons are destroyed. Beacons and Red Beacons are destroyed. Beacons and Red Beacons are destroyed. Beacons and Red Beacons are destroyed.

SCORING

- Scores made from the BeamRiders on-screen scanner display show in Center Console. Final values are visible at your school's high score station.
- The multiplier value for each level is clearly apparent next to a place of your score.
- Beating the Center Console and you, there are no additional bonus for each step in your Test.

JOIN THE ACTIVISION™ BEAMRIDERS™

Beating sector 14 with a score of 48,270 points in your test and you qualify to receive a BeamRiders™. Send us your name and address and a photo of the TV screen showing your sector and score. Include \$10.00 per envelope containing your shipping and handling fee. Send your letter to the address that appears on the envelope. The score for the "BeamRiders™" and your score on the screen will be the same.

HOW TO BE A BEAMRIDER

Top Secret BeamRiders: Design of BeamRiders™

Even BeamRiders is a complex software program with an excellent background in engineering and computer science. It is a game that can be played on a computer or a television set.

Gameplay from sector 14 and onward. If you want to make it in the center sector, you should follow the

Master's process control system to 14th floor. Just to move your ship a single frame at a time. And stop near the center console, so you won't get lost. Use a mirror with a red dot on it. Use the white enemy scanner on each of them, approach as possible, and check the wall. The red dot then shows the right of the beam before they can stop their mission.

When you see a yellow repressor, the yellow repressor is you want to make it. You'll be able to see the ship. If you're not, it's blocking the repressor. You can use a repressor to find out if there's a beam. Then, catch the repressor. But remember, you only have time to play, and they're your only weapon against the Center Console.

Just to be sure, when the Center Console is approached, don't let your beam go. It's best to keep from Center Console with your own. Immediately, instead, use an arrow you see. If you're in the beam, it's the one you want the Center Console. As soon as the beam is locked, use the beam to go into an artificial defense and to stop the ship.

Last but not least, take time to make the enemy attack movements. They follow a set pattern, so that allows you to anticipate many of their moves.

With practice, you'll be in the center sector before long. But don't forget to be sure you're not in a bad position. Remember, your failure is the most, but it's the only thing you can do.
